

THE FM FERRY EXPERIMENT

radio transmission live from the hurricane deck of the
Staten Island Ferry
 8 Days in September 2007

14 | 15 | 20 | 21 | 22 | 27 | 28 | 29

Listen on **WSIA 88.9FM** or at fmferryexperiment.net • for information & schedule go to: fmferryexperiment.net

The FM Ferry Experiment is a project conceived and programmed by the artist duo neuroTransmitter (Angel Nevarez + Valerie Tevere) in cooperation with the New York City Department of Transportation and WSIA 88.9-FM. For eight-days this project will transform the ferry into a floating radio station, continuously broadcasting out to the region as it travels between Staten Island and Lower Manhattan. Live programs consisting of lectures, interviews, and sound performances will take place on the hurricane deck of the Molinari class ferries and will be broadcast along with music, sound, and ambience via 88.9-FM and fmferryexperiment.net

The FM Ferry Experiment has been made possible in part by The National Endowment for the Arts, The Independence Community Foundation fund through The College of Staten Island - Staten Island Project and College of Staten Island Foundation, the Lower Manhattan Cultural Council with support of The September 11th Fund, and the Franklin Furnace Fund for Performance Art, supported by the New York State Council on the Arts and Jerome Foundation, with sponsorship from free103point9 Transmission Arts.
